Executive summary

This document is known as the Futswap white paper. This document establishes the bases for the Futswap crypto asset. This technical document is intended to serve as a guide to explain the proposal of this new crypto asset, a loyalty token.

This token has been designed for the community of interested in new classes of digital assets, such as: those used for means of payment, for international transfers or remittances, as reserve value, or speculative instruments. It is for a community looking for new business opportunities and to be part of the Futswap club where you will find incentives, bonuses, services and exclusive products.

Futswap is more than a token, it is a Holding of services that are already in operation for the management of extra-border capital.

For this reason, in addition to the Futswap token, the reader of this document will find information on the exchange and the Futswap club, which consolidate the growth base of the token.

About the Club

The Futswap club is the opportunity to experience this ecosystem on a higher level, consolidating a network that will allow members to have exclusive access to activities to develop these ties, as well as financial opportunities specifically for the community holding, and makes use of the Futswap token.

The Futswap club attracts a wide range of stakeholders; from entrepreneurs to digital citizens, including culture lovers and club fans.

The club welcomes members with an offer of services that is usually exclusive, that is, from which only members and their guests can benefit.

About the exchange

Since its creation in the year 2021, Futswap Exchange has been aiming to be the future of the exchange. With the launch of B2C and B2B financial solutions and tools. Futswap Exchange already has more than 10,000 users supporting them in the transition and adaptation to the new digital era and metaverses.

With a set of experiences, developed in blockchain technology using the BNB Chain for its initial launch with a bep-8 minitoken and migrating to Polygon Chain in November 2022, Futswap Exchange offers its users investment products, purchases, rewards and transfers between the digital and traditional financial sector.

Mission and Vision

Futswap's mission is to accompany and facilitate the means for the transfer and exchange of digital and traditional financial assets, in addition to providing means of payment to its users and financial management for their investments. Making life easier between the digital and the real world.

The team strives to provide a secure, reliable and convenient gateway between the contemporary financial world and the new world of digital currencies in a responsible manner. Futswap wants to help as many people and companies around the world as possible; in buying, trading and exchanging; both the Futswap token and other cryptocurrencies listed on the Futswap exchange and the main FIAT currencies.

This project is intended to lead the exchange market in a free, safe and transparent way. Intermediaries are dispensed with, thus reducing costs and allowing users to maintain control of their personal information, property and assets. A sustainable business over time. Simplicity and reliability are provided in an efficient product that focuses on creating a smooth and seamless trading experience, without compromising the highest security measures and standards.

The vision of the project is to secure and contribute to the adoption and applicability of the Futswap Token. Cryptocurrencies will continue to play a key role in the economy of the future. For this, we want to provide the means to our community to achieve its financial objectives.

From Futswap we are committed to becoming a digitalis trustworthy, reliable and coveted; that can be used by anyone, at any time and place or any business, and in this way achieve a positive impact on the lives of all our users.

Future challenges and solutions

The loyalty program based on the Futswap token

It is a program based on alliances with other reward systems through the use of a common token among allies. In turn, the loyalty system will take into account the use of the token and the services offered by Futswap.

Additionally, exclusive members will be able to participate in cultural and networking events, and will also have opportunities to create wealth through involvement in real estate programs and new types of private investment.

What is resolved

The year 2022 has experienced high inflation, generating instability in world markets, which means a loss of purchasing power. Life savings melt like snow in the sun. Therefore, there is an urgent need to exchange many national currencies for a stable currency. But still today, in many parts of the world, this type of exchange can be very difficult to come by and often only allows for small amounts and at exorbitant fees charged by many operators.

That is why Futswap offers a solution to savers who want to quickly transform part of their savings into a crypto asset. The Futswap token is a response to the devaluation of fiat currencies and the traditional banking system. Futswap is a fast, affordable, and secure tool that makes it easy to trade between fiat and stablecoins, as well as major cryptocurrencies.

At present, all public suffer from the problem of long latency of transactions and poor performance of deposits. Specifically, Bitcoin takes more than 30 minutes to complete a transaction, while Ethereum's transaction throughput is only 10 transfers per second (TPS).

Unlike bank transfers that can take hours or days, a quick (seconds) solution is needed where even small transactions are processed with a fee of a few cents and this is possible using Blockchain protocols built on Polygon technology. Chain that offers high-speed transactions.

Futswap is the financial solutions proposal that unites the crypto world with the economy and traditional financial services. The services it offers are completely legal and supervised. These services help users exchange fiat and stablecoins in a fast, affordable, secure, private, and legal way.

Futswap allows you to carry out operations quickly and safely.

It must be taken into account that Futswap is a company incorporated in Dubai, El Salvador, Estonia and Sweden, operating in more than 20 countries with 200,000 transactions today and has more than 10,000 clients since its creation. Futswap will continue to grow and will be able to scale the number of transactions thanks to the Polygon Chain platform.

Futswap

The main objective is to be a channel between the traditional savings, investment and payment mechanisms with the growing crypto world, as well as to improve the usability conditions of the platform for its clients by providing the tools that allow its users to manage their resources at a global level. global.

futswap
www.futswap.io

Developed solutions

Futswap has a range of financial services that cover the needs of customers, allowing them:

- a. Integrate bank accounts in different fiat currencies.
- b. Manage different cryptocurrencies.
- c. Use your financial assets in much of the world without restrictions.
- d. Access financial leverage services.
- e. Centralize the exchange, purchase and sale operations of cryptocurrencies; either for investment purposes, payment mechanisms or transfer of international assets.
- f. Make operations at very low cost.

Futswap services include:

a. The exchange (Exchanges)

The exchange platform is aimed at both natural persons and corporate clients for trading assets and futures based on cryptocurrencies.

Our activities are regulated and monitored by European Union legislation, with Estonian license No FVT000501 of April 12, 2021

b. A neo banking service for your liquidity

The great advantage of having a 100% digital bank is the possibility that gives clients the mobility of their money and their cryptos without borders or limitations

Futswap neo-banking has 10,000 clients and 20 companies since 2021

These services include:

- a. accounts Standard: These accounts are divided between accounts with fiat currencies and accounts in crypto.
 - i. accounts Standard support transactions in dollars, euros and sterling at this time.
 - ii. Crypto accounts support operations in BTC, USDT and ETH
 - iii. With the standard account, users have the possibility of requesting a prepaid card with recharge capacity, for payments in establishments in person or for electronic payments over the internet.
 - iv. It also offers the facility to make transfers between accounts of other Futswap users.
- b. Savings Account: Futswap offers accounts in fiat and cryptocurrencies.
 - i. Savings accounts in fiat currency can have transactions in dollars, euros and sterling
 - ii. . Crypto accounts can be in BTC, USDT and ETH
 - iii. 7% annual interest on the account balance. (Subject to change)
- c. Trust for loans to platform users: In the case of having an account with

Futswap and being a cryptocurrency *holder*, clients have the possibility of requesting loans at competitive rates, with collateral from the cryptocurrencies they have in the bill.

c. Futcard

The card allows you to use your money instantly, either for credit card purchases, using ATMs or for online payments.

These cards can be loaded in dollars, euros and sterling

At the time of writing, there are 4 types of Futcard:

- a. **Futcard 1k** with a limit up to \$1,000
- b. **Futcard 2.5** with a limit up to \$2,500
- c. **Futcard 5K** with a limit up to \$5,000
- d. **Start Black** with a limit of up to \$10,000
- e. **Premium Blue** with a limit of up to \$25,000
- f. **VIP Silver** with a limit of up to \$100,000

Additionally, Futcard cards have:

- a. Extended load limit
- b. Withdrawals at ATMs internationally (Restrictions apply depending on the country)
- c. Payments for online purchases
- d. Payments in points of sale
- e. For person-to-person transfers (Peer to peer thanks to our software, which offers scalability, robustness, anonymity and security).
- f. reward system
 - i. for customers for their acquisition and use.
- g. Support service (24/7) supported in the following languages in English and Spanish.

d. White

Companies interested in offering these services to their own communities can request them in white label.

White label services include:

- a. Hybrid Card (Credit or debit)
- b. Transfers person to person
- c. Support service is 24/7

The development of services is adapted to market changes, to ensure that the offer meets expectations and that consumers be satisfied. For this reason, Futswap is constantly growing its sales force, to establish a relationship of trust with its clients through the information and advice provided.

We currently have more than 10,000 Futswap

Futswap

e. Futswap Pay

It is the platform for paying for goods and services with cryptocurrencies in establishments. As well as the almost real-time dispersion of payments to suppliers, users or customers. Saving up to 70% in transfer commissions).

Among the most common businesses that use these services are:

Restaurants, deliveries, physical and online stores, companies, independent professionals, hotels, travel agencies, airlines and educational institutions.

Futswap Pay allows you to receive payments in BTC, USDT and ETH. The security and agility with which payments are made give great confidence to customers who use them.

Other advantages:

- a. Web payment buttons Payment
- b. link Payment
- c. control through the platform
- d. Bulk shipments through the Futswap API
- e. Payments are managed in separate wallets for each cryptocurrency.

f. Custody to protect your financial assets

Custody services are increasingly necessary, and Futswap to complete its value offer offers its clients the protection and custody of their assets.

This service has an audit and is adjusted according to the needs of the clients.

@Futswap

www.futswap.io

airdrop

operations will be carried out Airdrop to promote the entry of potential investors to actively participate and promote the ecosystem.

The purpose is to reward users interested in participating in the growth of the business with the Futswap token. A situation that undoubtedly captures the attention of many people, since it is a good opportunity to obtain more benefits.

The promotion strategy aims to expand the effective participation of new users and boost the economic activity of the project to which they are associated, having a positive impact on the growth of the Futswap ecosystem; promoting its development and guaranteeing a better distribution of the tokens, thus decentralizing the control of the project.

The initial airdrop seeks to reach a critical mass of users for the consolidation phase of the project.

How to participate in a Futswap Airdrop?

Types of operations Airdrops to be carried out

First Airdrops “Call to action”. Fulfillment of missions

The first phase is thought of as a “Welcome Pack”: The Welcome Pack to thank new users for their connection.

Tokens will be delivered in counterpart of “**call to action**”: The objective is to ask users to perform certain tasks in order to participate in the bonus process such as:

- 1. Register in the exchange** and make a first deposit of 500 USDT and keep for 3 months locked you will receive 10 USDT in Futswap token
- 2. Buy Futswap token packages** in exchange you will receive Futswap token according to the following table:

Purchase of Package	Immediate incentive
---------------------	---------------------

Futswap®

	Amount of additional Futswap tokens received
Package of 100 Futswap tokens You	will receive 5 additional Futswap tokens
Package of 200 Futswap Tokens You	will receive an additional 10 Futswap Tokens
Bundle of 300 Futswap Tokens You	will receive an additional 20 Futswap Tokens
Bundle of 400 Futswap Tokens You	will receive an additional 30 Futswap Tokens
Bundle of 500 Futswap Tokens You	will receive an additional 50 Futswap Tokens

3. **For requesting the Futcard card**, activating it and charging it (minimum charge 100 USD), the client will receive 10 USDT in Futswap token.

Newly created airdrops along with associated information will be published exclusively on the official Futswap website and airdrops.io **page**. In these locations all the necessary steps will be indicated to be able to participate in the different airdrops.

***It is not an investment:** Futswap airdrops are free remittances of Futswap tokens, which will be delivered to users with the aim of encouraging the use of services and the economy of the project. In no case should they be considered as a form of investment in the project, for which money can be asked in exchange for benefits or participation in it from the founders.*

Second Airdrops for Holders. Investment in long-term Futswap token Airdrops

for possession:

The requirement to receive the airdrop is to have a certain amount of the token in the wallet destined by Futswap. Normally, the amount to receive per airdrop is related to the number of tokens in possession. In this way, the greater the possession of tokens, the greater the reward to be received.

By linking to the possession Airdrop the user will receive Futswap tokens according to the following table:

Futswap

@Futswap

www.futswap.io

Valid up	to Futswap	Tokens Additional tokens received
03/30/2023	500	25 Futswap tokens
03/30/2024	600	42 Futswap tokens
03/30/2025	1200	120 Futswap tokens

tokens to **The** must remain for one year.

Earn / Return on Savings on Futswap Token

Designed to increase user income

Earn is a way to earn rewards by holding the Futswap Token.

The investor can allocate a portion of their assets and earn a reward percentage over time. This usually involves a *"investment fund"*, which can be considered similar to certificates of deposit with a fixed term.

Many long-term cryptocurrency holders look **to earn** a way to put your assets to work generating rewards, instead of having cryptocurrency portfolios gathering dust.

The **"earn"** usually requires a blocking period or **"vesting"** during which your crypto-asset cannot be transferred. This can be a disadvantage, since you will not be able to trade with tokens blocked for a period, even if the prices fluctuate, for this reason it is recognized with a higher investment rate than the one offered by the financial sector for term deposits.

"Earn" is a process of investing cryptocurrencies to earn a return in the form of passive income. Essentially, the user adds liquidity and earns rewards in the form of interest in return.

Earn money with interest:A simple and safe way to generate passive income.

If the user does not intend to trade daily, this is an excellent solution and will benefit from both the interest and price developments of your asset in the long term. Please note that even if the assets are locked, they are still owned by the user. Username. However, they cannot be used to make transactions or be transferred to another Wallet.

No hardware or special knowledge is required, all you have to do is have Futswap tokens in a wallet intended for recognition for having part of these tokens blocked. It is the way in which the network pays the investor and he can obtain passive income.

You will be able to receive the profits while ensuring that your deposits increase in value during the holding period.

The reason why the Futswap cryptocurrency offers rewards

The earn works in the same way as a deposit of a fixed-term certificate, but by investing in the **"earn"**, the user contributes to the development of the Futswap platform and in return receives a higher rate than what you receive in the traditional financial sector.

All deposits are found in a smart contract, which in turn guarantees more security regarding the conditions and payment periods, entry and exit of the investment, as well as returns. Once the initial investment plus the interest earned is returned, the smart contract is terminated.

After the "Buy" purchase, "Savings" are immobilized (in the *Lock-Earn Wallet*). Futswap tokens intended to receive "Earn" benefits will generate passive income in the form of interest. "Receive". At the end of the period, both the investment and its interest are returned to your personal Wallet.

Earn Locked Earn Locked

Reward Table

Hold Amount	Locked	Yield % APR*	Minimum	Contributions Maximum Contributions	End
55555	20000	36%	100	500	03/30/2023
62500	15000	24	120	600	03/30/2020
1250020	1250020	%	Earn	Date	03/30/2025

*APR. is the periodic rate times the number of periods in the year. In this case, nominal annual due. This value will be settled according to the time of possession.

Rewards	Futswap Crypto
----------------	----------------

Futswap

Minimum and maximum amounts	120 / 1200 according to periods
Blocking	period Fixed retention period: This means that you will not be able to withdraw your assets before the determined period. The blocking period will be set at one year from the deposit.
Recurrence of payments	%APR according to the Hold Amount. Annual 03/30, 2023, 2024, 2025

To avoid market manipulation, there will be a lock-up period in which participants will have to comply in order to receive returns.

Loyalty model The loyalty

strategy

Why a loyalty token?

Loyalty tools such as loyalty and sponsorship programs with personalized promotional offers will be implemented. Affiliate loyalty is a major strategic challenge as it is essential to do everything possible to keep affiliates engaged.

strategy "*inbound marketing*" is intended to retain our customers, it is not based solely on the application of tools, but rather seeks to provide financial opportunities that develop a link in the community.

An interactive relationship marketing system is being implemented based on relationships with affiliates and loyalty; creating and sharing relevant offers, with the aim of creating long-term relationships.

The marketing program is accompanied by an incentive program based on tokens, which will allow greater flexibility at the time of transfer and future integration with programs of future allies

. The tokens can be exchanged with other programs, cryptocurrencies or traditional fiduciary money; with the goal of becoming a rewards and investment asset. The future investment scheme contemplates sectors such as real estate within the Futswap ecosystem.

Futswap vs. Loyalty Models

One of the main problems with most loyalty programs is their strict redemption process. This is where the Blockchain comes into play, allowing companies to transact with each other through a loyalty engine in an open and decentralized protocol system.

The decentralized and collaborative program is governed by a loyalty engine based on Blockchain technology. It is an innovative use that combines a wide offer with the specific interests of our users. Futswap offers a wide range of products and services for affiliates to redeem their loyalty points.

The platform will offer affiliates the possibility of benefiting from special or promotional offers. Additionally, users will have access to private sales, and/or exceptional commercial discounts during their periods of maximum demand. These offers can refer to all affiliates or be proposed by the seller on a case-by-case basis.

Futswap Club within the Futswap loyalty

model has a VIP, a private circle that will provide members with both experiential experiences and financial opportunities.

The loyalty engine is built on blockchain technology, in such a way that the points belong to the users and each one can use them at the time they consider convenient since they do not expire.

Subscription plans will have periodic payments that will give you access to different rewards according to your enrollment level.

Futswap has the possibility of making international payments through your card or your wallet. In this way, the tokens received can be used for tangible and intangible prizes, both with the markets associated with the network and those that are outside of it.

Members will be invited to exclusive Futswap events where they will be able to enjoy different activities reserved for active members of the club.

Among the activities that Futswap will offer its members you can find:

- Exclusive events on yachts in different places (Dubai; Marbella, Miami, Monaco, etc.)
- Exclusive events in luxury villas.
- Invitation of celebrities from the crypto and business world to events.
- Rent luxury villas with special conditions payable with the Futswap token.
- Activities to strengthen the network and more news to be revealed soon.

Construction of the loyalty engine

To be part of the Futswap club, you must follow a few very simple steps. The exclusive member may be bound by the payment of his membership stipulated in the terms and conditions of the FEC Futswap Exclusive Club.

Advantages of the Futswap rewards system Immediate

- availability of points for redemption
- Points do not expire
- Depending on the plan, it can generate income
- Security of the availability, use and transfer of points by being registered in the

Tokenomics

The platform has a token called **Futswap Token** that will work natively on the . It will have a limited supply (borrowing Bitcoin's principle of limiting supply) of 1,000,000 tokens. The goal

Futswap

of having such a limited supply is to allow us to control token inflation, as well as gain value through organic and exponential growth.

Token Use Cases

The plan is for the token to have several utility functions, including helping payments and the movement of value in investment projects, for example real estate, as well as other appropriate businesses and investments.

This token is the main unit of exchange in the multifaceted and decentralized Futswap ecosystem. Furthermore, users will be able to use the Futswap token to pay, transfer funds and even settle payments.

Futswap Token will function as a *Fidelity Token* that can be widely used on the platform to access a variety of products and services.

The Futswap token will be integrated with the other offerings on the Futswap platform, allowing users to unlock the true value of their token holdings. The destination of the Token resources is the reinvestment in the operation and in the means to grow the community and the use of our services, this includes marketing.

The surplus value of the token price growth is essential to generate working capital. These funds will be used in the development and improvement of the Futswap financial ecosystem, as well as the development of its own tools and services, with smart contracts that allow the tokenization of projects on the platform. Token sales will take place on various cryptocurrency exchanges, both centralized and decentralized.

Technical infrastructure: Why do we use Polygon Chain?

In 2008, with the publication of "A Peer-to-Peer Electronic Cash System" by Satoshi Nakamoto, Bitcoin started, the first cryptocurrency that allowed a spectacular growth of blockchain technology. The first Exchange (cryptocurrency exchange) began operations in March 2010. With Vitalik Buterin's concept paper in 2013 that came to life as an independent Blockchain, in 2015 the possibility of creating smart contracts began, and paved the way for the part business with the possibility of financing through ICO and the consolidation of decentralized financing known as DEFI. However, the scale of Ethereum has emerged as a problem, with high gas fees weighing down network users during specific periods.

Ethereum proved its worth and dominated the crypto space, though due to scalability issues, users started looking for alternatives.

For these reasons, it was chosen to work with Polygon Chain technology, a new, faster and cheaper high-performance blockchain. Polygon Chain offers Ethereum Virtual Machine (EVM) and smart contract capabilities without causing network congestion or reduced performance.

ahead

ChallengesT he overall development drive now faces a number of key challenges.

The fusion of blockchain technologies and AI will enable Futswap to build a revolutionary cryptocurrency, supporting significantly higher transaction speed, superior accessibility for general users, enhanced security from malicious attacks, and highly flexible operations.

In order to be at the forefront of innovation, we are consolidating a series of alliances, agreements and unions with leading companies in the technology sector. Not only to offer cutting-edge disruptive products and services, but also to be more reliable and at the forefront in this sector.

Public

Roadmap

January 18, 2021

Pre-lanzamiento, creación del token

- Pruebas de distribución, única quema de 100 tokens
- Consolidación del equipo
- Liberación de 50.000 token de Reserva de valor que va a sumar en fideicomiso, el cual aumenta con el valor de los activos, más la utilidad trimestral y la inyección de capital. Esto equivale al 5% del total supply, que es nuestro security token para el futuro.
- 250.000 team vesting, release a 10 años total

01 de Agosto 2022 Lanzamiento

- Lanzamiento **“public sale”**
- 299.950 Tokens de 2 años
- Inician los Airdrops y los Earn locked. limitado hasta 20.000 cada uno
- Earn programado hasta por 55.555 tokens con una rentabilidad anual de 36% APR con una inversión mínima de 100 tokens y hasta 500 tokens de inversión máxima.
- Pre-Lanzamiento del Club Futswap

01 de Abril de 2023

- Lanzamiento del Club Futswap
 - Tercera liberación de los tokens de Inversión por una cantidad de 149.975
 - Earn programado hasta por 62.500 tokens con una rentabilidad anual de 24% APR con una inversión mínima de 120 tokens y hasta 600 tokens de inversión máxima.
 - Continúan los Airdrops y los Earn locked. limitado hasta 15.000 cada uno
- Liberación de 50.000 tokens del team vesting
- 20.000 en airdrop desde Agosto 1 2022

30 de Marzo de 2024

- **cuarta** liberación de los tokens de Inversión por una cantidad de 149.975
- Earn programados hasta por 125.000 tokens con una rentabilidad anual de 12% APR con una inversión mínima de 230 tokens y hasta 1.200 Tokens de inversión máxima.
- Continúan los Airdrops y los Earn locked. limitado hasta 15.000 cada uno
- Liberación de 25.000 Tokens del team vesting

01 de Abril de 2025 y Años siguiente 25.000 hasta cumplir los 250.000 10 años (Le da seguridad al inversor)

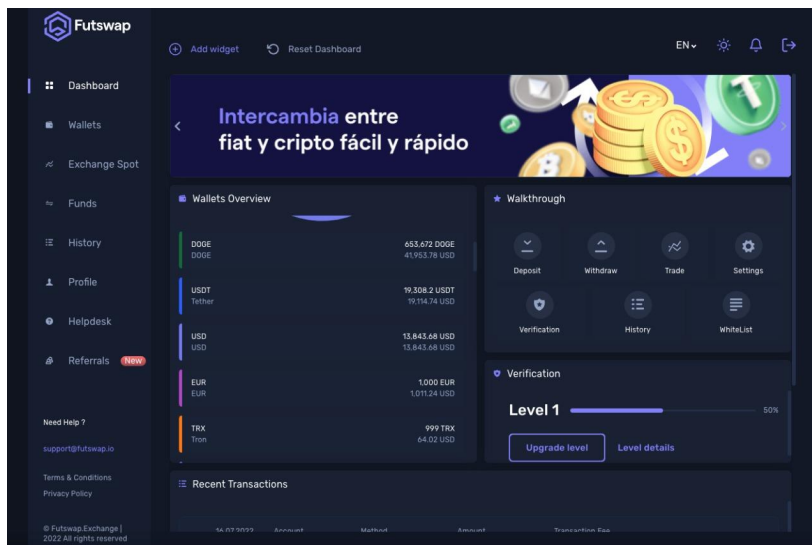

El token es para aprovecharlo en la comunidad

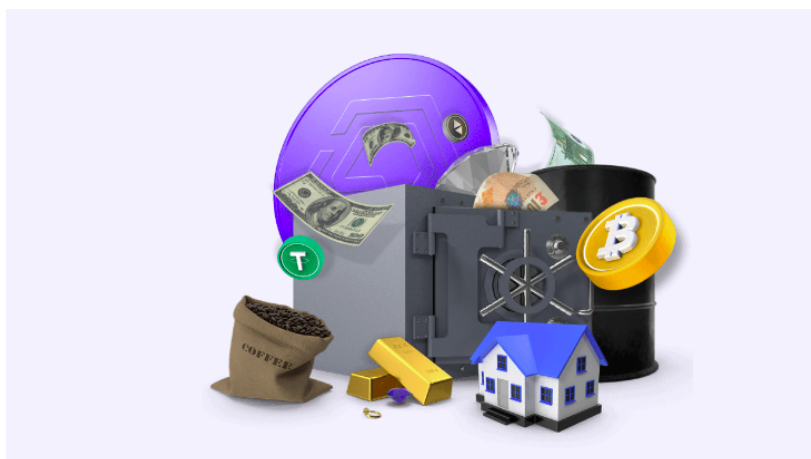

Regulación
